   Powell asked if the information about Beach was just extra information on the sheet. Knopp said he didn't know.

   Sandberg said there is no definition for beach in the Municipal Code. Hammett said the Commission could vote on the proposed definition of Parks. Sandberg said the definition should be placed in the beginning of the section regarding Parks. Powell said it makes more since to him to provide a proposed definition of Parks and Beach and not say where the definition is located. 6. **Reports, Recommendations of Commissioners Regarding Signage in Parks:**

   Powell suggested one sign in each park that is big enough to list all the rules rather than having a lot of little signs.

   Sandberg said he believes uniformity is important. He believes simple is best and suggested wording that says Municipal Code 48.01 governs the use of this area. He suggests starting with a minimal amount of information and adding more if there is a problem in a certain park.

   Hammett suggested that you categorize the parks. The first category might be, "this park is governed by Municipal Code 48; a second category might be one that identifies items such as "no dogs" and "no alcohol". He said using international signage with characters such as dogs and cigarettes.

   Sandberg asked if staff can provide a list of parks that shows weather dogs are allowed, jump houses, alcohol, camp fires, etc.

   Sandberg said that the parks with the greatest use should have the signs with the symbols identifying the unauthorized used.

   Hammett said staff should identify if dogs are allowed, on lease or off lease, on sidewalks, etc.

   Knopp confirmed that the Commission wants staff to provide a list of sign requirements for parks such as where and how many, and where does the municipal code number need to be on the sign. They also want a list of parks that shows weather dogs are allowed, jump houses, alcohol, camp fires, etc.

   No motion made.

   Hammett asked to receive the same information on bays and beaches as requested on Parks.
