

## **Comprehensive Active Transportation Plan**

The scope of work includes identification of projects and recommendations that will improve the City's multi-modal transportation network to better accommodate the needs of pedestrians, bicyclists, and students biking or walking to school. Deliverables include a Pedestrian Master Plan, an updated Bicycle Master Plan, an updated Safe Routes to School Plan, and environmental review of all proposed improvements. The planning process includes robust public involvement components to engage Coronado's active citizenry, including stakeholder interviews, a Stakeholder Advisory Committee, public workshops, on-line questionnaires, and community bike and walking tours. The final adopted plan will include prioritized project recommendations for pedestrian, bicycle, and Safe Routes to School improvements, as well as an implementation and funding plan.
