

**ADDENDUM NO. 1
PARKER PUMP STATION REPLACEMENT PROJECT
CITY OF CORONADO**

June 14, 2022

This addendum is issued to all respondents for the City of Coronado’s Notice Inviting Bids for the Parker Pump Station Replacement Project dated May 23, 2022. There is one page to this addendum.

- 1) The original PDF file of the Parker Pump Station Replacement project plans has been replaced as the original was unprintable/causing printer errors. A revised set of plans have been uploaded to the OneDrive account containing bid documents; no changes have been made to the project design or notes – the PDF was simply recreated using a different process that should result in no printing issues. The file is titled “Final – Parker PS Plans (flattened signed)”.

Click here for link to project files (same link as previously sent out): [Parker PS Bid Docs](#)

- 2) Please note numerous questions have been received by the City of Coronado – responses are currently being drafted and will be issued in the form of an addendum as soon as possible.

The bid date remains unchanged by this addendum.

Note: You must acknowledge this addendum in your submittal. Failure to do so will result in your proposal being deemed non-responsive.

Jim Newton
Acting City Engineer
