The Showdown at Yellowstone is a story of glory, despair and redemption, as it traces the exploits of the Montana lawman team of Sheriff C.J. Mason and Deputy Thorn Hickum, from their young wrangling days in 1890 to a wild decade of perilous adventures. Just as they breathe easy, an accidental explosion at a steamboat warehouse uncovers a bizarre set of clues that convince them the President of the United States is targeted for assassination. They vow to prevent this plot, but it looks like an inside job, so they are on their own. Their intervention takes them from Washington DC to Yellowstone, where the President loves to vacation, unaware that he just placed himself in the greatest danger of his life.

Set in the wake of General Custer's tragic massacre at the Little Big Horn, *The Big Horn* tells the story of a celebrated steamboat captain who rescued the tragic survivors of the 7th Cavalry, forcing him to bury a fated gold shipment along the banks of the Little Big Horn to make room for the wounded. Thirty years later, while trying to solve a murder, a Montana lawman stumbles upon a clue that might not only solve the crime, but possibly lead to the whereabouts of the lost gold, a discovery that puts him on a collision course with those determined to stop him.

Author, Dr. Larry Richardson, born and raised in Southern California, is an outdoor enthusiast, backpacker, and long distance runner. He currently lives in Cleveland, Tennessee.

The Showdown at Yellowstone is prequel to *The Big Horn*, the first in a series by Larry & Tom Richardson. Watch for *The Treasure of Bitter Creek*, the next story in the book series about the exploits of C.J. Mason & Thorn Hickum will be released in spring, 2018.
